Commodity Analysts – natural gas fund (Southport, CT)

Hedge fund that focuses exclusively on the North American natural gas market wishes to add dedicated natural gas analytical support to the team, one full-time position and one intern for summer 2017. The positions are focused on following, understanding, and reporting on the fundamentals of the North American natural gas markets; supply, demand, imports/exports, regional flows, weather, and price.

No prerequisite knowledge is necessary – a strong desire to learn and ability to get along with the team are of critical importance. You will sit on the trading desk alongside a portfolio manager with 30 years of experience.

Please ensure resume lists GPA, relevant course load (with respective grades), SAT/ACT scores, and any relevant extracurricular activities.

In your cover letter, please explain why you’d like to pursue a career in commodities.

Candidates will have some or all of the following skills/qualities:

- Knowledge and understanding of the North American natural gas market, power sector and related weather impacts
- Highly skilled with Excel; proficient with PowerPoint, R, Python, Bloomberg
- Detail oriented, quick thinking, with ability to produce under pressure
- Excellent verbal and written communication skills
- Aptitude for analyzing/manipulating data and presenting findings to senior staff and clients
- Highly numerate, comfortable handling large data sets
- Personable, with ability to work comfortably in a small team
- Motivated to join a growing business
- Prior internship / work experience preferred
- Ability to commute to the office in Fairfield County, Connecticut without accommodation
- Full U.S. work authorization
